## FTI Relocation Announcement

**Oakville, ON, CANADA – June 26, 2009** – Forming Technologies Inc. (FTI), the world’s leading developer of software for the design, simulation, and costing of sheet metal components, has announced that after 20 years, it will be relocating. Effective August 21<sup>st</sup>, 2009, FTI will be located at 3370 South Service Road in Burlington, Ontario L7N 3M6. This relocation is in parallel with its corporate growth objectives allowing for further expansion and product development.

“It is a very exciting time right now for our firm,” states Michael Gallagher, Vice President of Forming Technologies Inc. “We have seen tremendous growth in several areas of our business that now warrant expansion and unfortunately, our current building will not suffice. Our new location is almost double the size of our current home and therefore, will be large enough to facilitate our current requirements as well as the expansion of our development and sales teams. All of our telephone lines and websites will remain the same and be transferred to our new location.”

### About Forming Technologies

Forming Technologies Incorporated (FTI) is the world’s leading developer of computer aided engineering software for design, and simulation of sheet metal components. Since 1989, FTI has provided OEMs and suppliers in the automotive, aerospace, and appliance industries with innovative software and training solutions designed to reduce development time and material costs. FTI has trained over 12,000 engineers in Formability and Die Design and is considered the Best in Class around the world for their industry training programs. FTI and it’s global network of business partners provide sales and technical support to customers in more than 35 countries.
